CONSULTANTS

Securely Yours is comprised of highly skilled security professionals. Hundred percent of our employees and contractors are certified CPA, CISSP, CISM or CISA.

SECURE CLOUD BENEFITS

According to Gartner, whether you are ready for cloud computing or not, it is here to stay. There are some who may say that security over a cloud is a “death sentence”. We tend to agree with the general statement, but there are several security services which can be securely deployed within an organization without compromising the high security standards.

PENNY SAVED IS PENNY EARNED

Cost benefits of Software as a Service include reduced total cost of security services. This is due to the fact that an organization does not incur software or maintenance fees but only pays for the services it consumes.

Business Continuity & Disaster Recovery Planning

METHODOLOGY

- **1. Understand Company Business Policies and IT Policies:** Identify and understand company policies, laws, regulations, IT assets and their support of key business processes to define an IT risk profile. Understand and define scope, and roles. Ensure Management approval of Policies.
- **2. Business Impact Analysis:** Assess and identify critical functions, resources. Identify threats. Calculate risks based on threats. Identify backup and recovery solutions.
- **3. Preventive Controls:** Implement controls and mitigate risks.
- **4. Strategies:** Build a comprehensive strategy covering business processes, facilitating and supporting technology, user environment, and data.
- **5. Documentation and Plans:** Document key procedures and recovery solutions, defining roles, tasks, and emergency response.
- **6. Communication and Organizational Change Management:** Provide online training, in-person training, track training efforts, distribute BCP cards with key information. Build dashboard and key metrics to monitor adoption.
- **7. Test Drills:** Provide validation of key processes via drills and conference room pilots. Track all information per Dashboard.
- **8. Maintenance and Governance:** Provide process and mechanism to insure plans are kept up-to-date with changing business conditions.
