Business Continuity is the ability to continue critical business process during and to recover from unexpected events, such as natural and man-made disasters. Disaster Recovery is the set of actions and resources required to restore the computing systems that support the critical business process.

Planning makes the critical difference between successfully managing an incident within acceptable parameters and having a situation on hand that may take days, weeks or months to recover. Good planning can prevent a lot of headaches—by being prepared and having a comprehensive Business Continuity Plan in place and Disaster Recovery Plans for coping with the unexpected or sudden loss of data, hardware, and software.

Our goal is to maximize return of investments within your IT budgets. Through a measured blend of onsite consulting and managed services, and Software-as-a-Service. Securely Yours provides innovative services designed to improve your Business Continuity Planning and Disaster Recovery posture while reducing your overall cost. We use our extensive knowledge of IT operations in tandem with “Big Four” audit experience to provide security-as-a-service for your organization.

Securely Yours LLC has the knowledge, experience, and tools to help you create a comprehensive Business Continuity Plan. In conjunction with our business partners, we can help you complete all aspects of your Business Continuity Plan as identified in the diagram above.

## CONSULTANTS

Securely Yours is comprised of highly skilled security professionals. All of our employees and contractors are certified CPA, CISSP, CISM or CISA.

## SECURE CLOUD BENEFITS

According to Gartner, whether you are ready for cloud computing or not, it is here to stay. Cloud computing allows an organization to address IT costs with a 'just-in-time' approach. Hard IT costs (servers, storage, applications licenses, IT Staff time) can be increased (decreased to respond to business cycles without requiring ramp-up or down time. A secure cloud environment can provide the same and even additional security of an enterprise's data and applications. It provides a centralized, managed IT infrastructure that the enterprise pays for on a usage bases eliminating its own IT capital costs.

## SECURITY-AS-A SERVICE

Cost benefits of Software as a Service include reduced total cost of security services. This is due to the fact that an organization does not incur software or maintenance fees but only pays for the services it consumes.

# Business Continuity and Disaster Recovery

Securely Yours provides the following services:

## Risk Management

- Identify risks that may affect your business and rank them by probability and impact
- Business Impact Analysis
