

# Security Information and Event Management

ONE INTEGRATED SOLUTION FOR LOG & EVENT MANAGEMENT, FILE INTEGRITY MONITORING, ENDPOINT MONITORING AND CONTROL—DELIVERED VIA SECURITY-AS-A-SERVICE (SaaS) ARCHITECTURE

Most organizations are not managing their logs as they should. Typically they acquire and manage separate products for log management, event management, file integrity monitoring and endpoint monitoring & control. Securely Yours has partnership with LogRhythm and Intellitactics to bring these traditionally disparate functions together in one fully integrated system. With our offering, the organizations can quickly and efficiently comply with government regulations, secure their networks and optimize the availability and performance of their infrastructure.

Our solution automates the collection, organization, analysis and archival of all log data. In addition, it provides real-time correlation, critical events alerts, intelligent IT search, and extended visibility and control to activities on desktops and laptops.

Our solution is cross-platform, highly-reliable and easily scalable. Instead of buying expensive software licensing or appliance, our solution allows you to pay for what you want. We can customize the solution based on your need and price it accordingly. This allows you to free up your capital dollars for other investments.

## SECURE CLOUD BENEFITS

According to Gartner, whether you are ready for cloud computing or not, it is here to stay. Cloud computing allows an organization to address IT costs with a 'just-in-time' approach. Hard IT costs (servers, storage, applications licenses, IT Staff time) can be increased (decreased to respond to business cycles without requiring ramp-up or down time. A secure cloud environment can provide the same and even additional security of an enterprise's data and applications. It provides a centralized, managed IT infrastructure that the enterprise pays for on a usage bases eliminating its own IT capital costs.

## SECURITY-AS-A SERVICE

Cost benefits of Software as a Service include reduced total cost of security services. This is due to the fact that an organization does not incur software or maintenance fees but only pays for the services it consumes.
