

Securely Yours LLC

WE SECURE YOUR INFORMATION WORLD!

MANAGED SECURITY SERVICE PROVIDER (MSSP)

SecurelyManaged.com

MANAGED SECURITY SERVICES SPECIFICALLY DESIGNED FOR SMALL AND MEDIUM BUSINESSES, LAW FIRMS AND MEDICAL SERVICE PROVIDERS

Cyber threats are real!

Federal, state, and industry regulations are increasingly putting pressure on organizations to invest heavily in cyber security. The availability of good security professionals is in short supply. Large organizations have budgets to address these cyber threats. Small and Medium size businesses are caught in a dilemma. They don't have the resources to manage the cyber threats and ensure that their network is monitored.

How does the Solution Work?

Our offering is designed to work with your network architecture and environment. Whether you have a single data center environment, multi data center environment or a hybrid data center / cloud environment, our Security Information and Event Management (SIEM) architecture can handle your environment. Whether you have an existing SIEM or not, our solution will install the appropriate sensors and collectors in your organization, monitor and analyze your network traffic, and send alerts to you if and when our monitoring centers detects anomalies in your network traffic.

What is the Our Approach?

Unlike other Managed Security Service Providers, who just monitor whatever logs you send to them, we have a phased approach to assist you. We first work with you to identify all the appliances whose logs should be monitored and make sure the audit parameters are enabled. Secondly, we work with you to identify and define the appropriate alerts which should be sent you your organization. Finally, we start the monitoring process and periodically tune the process to make sure that the service is meeting your expectations. Optionally, we can also assist you with our consulting services to manage the alerts and vulnerabilities identified by the alerts.

What Technology do we use?

Our solutions are based on Alien Vault (our business Partner), with Securely Managed add-ons.

ALIEN VAULT

Securely Yours LLC

Benefits

- ✓ Immediate notification of a security threat
