# VULNERABILITY ASSESSMENT

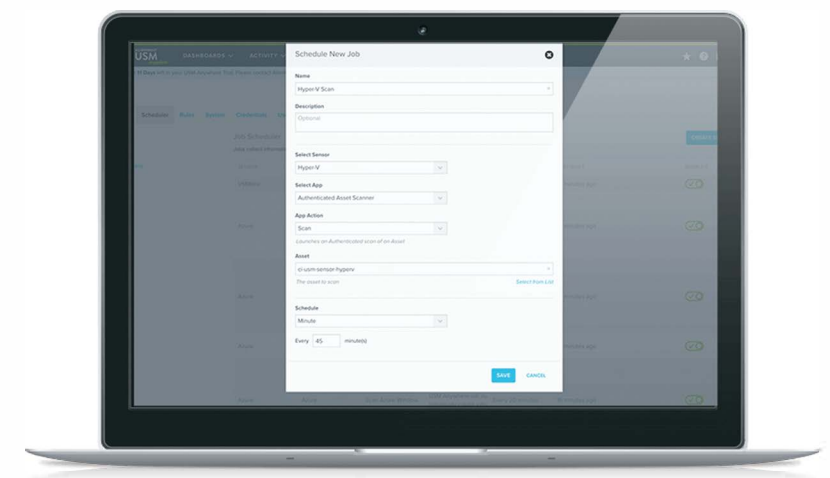

## NETWORK VULNERABILITY ASSESSMENT

Securely Yours provides comprehensive network vulnerability assessments, that will allow you to identify vulnerabilities in your IT infrastructure and give you the ability to remediate the issues before hackers can attack.

## AUTHENTICATED NETWORK SCANNING

Authenticated scans perform vulnerability assessment by using host credentials to scan from an inside vantage point. It reviews vulnerable software packages, local processes, and services running on the system. Authenticated scans have the benefit of discovering many more vulnerabilities that can't be discovered without authenticating to the target and it provides a complete visibility into the target system.

## AUTOMATED SCANNING

New Vulnerabilities are discovered every day. To maintain network security, constant monitoring and scanning is necessary. Our solution allows you to schedule scans that run daily, weekly, or monthly at a time your choosing. Automated scanning ensures continuous visibility of your vulnerabilities. This allows you to detect vulnerabilities as they arise.
