

Securely Yours LLC

Business Continuity Planning (BCP) & Disaster Recovery (DR) Consulting

Can your company survive a disaster?

Unexpected events in the form of a natural or man-made disaster can have a major impact on any organization. Sometimes, the inability to survive such unexpected events and keep the important business functions running during this time can result in significant financial losses or even bankruptcy.

Most organizations have business continuity and disaster recovery plans but almost every organization in our experience agree that these plans are either not current (due to technological changes in their IT environment) or the plans have never been tested. Securely Yours LLC (SY LLC) has developed innovative methods to keep the plans current and test the plans on a periodic basis. Our state-of-the-art mobile apps (iOS, Android and Web platforms) allows our clients to manage the incidents in real time. Check out the details of our Disaster Recovery app at:

www.SecurelyMobile.com/dr

SY LLC provides the following consulting services related to BCP/DR:

- » Business Impact Analysis
- » IT backup and recovery architecture and design
- » BCP/DR Plan creation and publishing
- » Disaster Recovery testing and table top exercises
- » Periodic review for changes to the BCP/DR Plans

What our clients are saying:

"Securely Yours was very prompt, efficient and always willing to the "extra mile" to ensure we reached our project goals, and were always very professional in providing their services...."

"Their deliverables were excellent. They are very professional!"
